

ACC Approval for Landscaping. Yes, it's Necessary.

The combination of the long drought and last winter's freeze took its toll on many yards in Crownridge. Last spring, our manager issued letters to some owners requesting that they advise the Association of their plans to re-sod or re-landscape their yards. Some yards just need all of the dead plants removed and/or replacement of sod. Yards that were completely brown and/or bare dirt required more of renovation. Many residents decided to make a major landscape improvement to their yard. When that happens, ACC approval is required.

What exactly is a major landscape improvement? Check out these photos - the owners removed about 3 ft. of sod along the curb, installed xeriscape plantings and used crushed granite with a Texas stone blend border.
